WEEKLY NEWSLETTER

No. 2014-1

For the period April 16 – April 18, 2014

NOTE 1: Any person, group, newspaper or entity not receiving this newsletter and wishes to receive it by email, or if you are getting it and wish to discontinue, or if you have an address change, please respond to us using one of the above contact points.

General Interest: The Western Kansas Weather Modification Program (WKWMP) started its 40th consecutive season of operations this week. The program will operate for roughly five months this year, April 16th through September 15th. The program's objectives remain unchanged: to reduce hail and optimize rainfall over a portion of western and southwestern Kansas. The sources of funding this year are from participating counties and Groundwater Management Districts in Scott City and Garden City. Western Kansas Groundwater Management District #1 in Scott City is the WKWMP administrator who owns all the equipment and hires the personnel. This year, two cloud-base seeding aircraft will be utilized as well as our cloud-top aircraft. The target area consists of three participating counties: Scott, Kearny, and Lane.

Walt Geiger, Program Meteorologist (13th year) will direct seeding operations from the operations office at the Kearny County Airport. WKWMP Pilots-In-Command this year include Kyle Spencer out of Scott City and Scott Bryant out of Lakin. Kyle Spencer (28th year), our Program Manager and Chief Pilot will be flying cloud-base or cloud-top depending on forecasted storm severity. Scott Bryant (8th year) will fly cloud-base. Weston Thompson out of Scott City and Steve Phillips out of Syracuse will occasionally serve as stand-in pilots or command a third plane depending on forecasted storm severity.

Weather: The week started out with some snow over the weekend and then rain by midweek followed by pleasant temperatures and dry conditions to finish the week.

Operations: There were no operations this week.

Walter Geiger, Meteorologist
